25X1

The following observations were made during a train trip from Gdansk to Warsaw, via Malbork (Marienburg), Ilawa (Deutsche Eylau), Dzialdowo and Ciechanow:

1. Some large "military" buildings and underground structures were being erected in the forest area west of the Ilawa railroad station. The buildings begin at a point about 120 - 150 meters west of the station. A branch line ran from the main railroad line into the forest area. There were many workers, including youths of both sexes, employed on this project.
these buildings will form a military depot similar to the one which has been completed near Ciechanow in the Czeruchy forest.
2. The military depot in the Czeruchy forest is connected with the main railroad line by a double track railroad line--there is no railroad station in Czeruchy. A double row of barbed wire, about three meters apart, has been stretched along the west side of the highway which runs parallel to and west of the main railroad line. This barbed wire runs for about one kilometer in the direction of Ciechanow. A watch tower manned by two soldiers armed with a light machine gun was observed next to the double track railroad line. Informant estimated that about ten one-story buildings composed this military depot.
3. An infantry regiment was located in Ciechanow.
4. A Polish airforce regiment was stationed in Nasielsk.
5. A new airfield was under construction on the eastern side of the Nasielsk-Nowy Dwor road.
